

Muddy Waters: Who Owns the Rain?

Thursday • February 12, 2009 • 8am – 4pm
Denver Botanic Gardens

Water is the greatest challenge in creating sustainable Colorado landscapes, homes, and communities. Rainwater and greywater are potential sources of water, but can they be used legally in Colorado? And if so, how? Join us for a full day symposium at Denver Botanic Gardens which will include:

- **Brad Lancaster**, author of *Rainwater Harvesting for Drylands and Beyond*
- **Panel discussion** of Colorado's quirky, complicated water laws, moderated by **Paul Lander**, Executive Director of the Colorado Waterwise Council
- **Lunch-time roundtables**, hosted by the panelists and speakers
- **Michelle DeLaria**, stormwater BMP scientist with Denver Urban Drainage
- **Keith Bowers**, president and founder of Biohabitats, a pioneering ecological restoration company

\$75 pre-registered • \$90 day of event • \$20 student • \$10 for optional box lunch
Registration and more details are available by calling DBG at 720-865-3580
Or visit www.denverbotanicgardens.org and view Calendar page • DBG Course #09BLLI19
